

Undulating and irregular in form, the striking A.Cepa Mirror commands attention and reflects a sense of random order. The sculptural frame, with rich texture and depth, is sand-cast at a fine art foundry in Pennsylvania and finished by hand.

## A.Cepa Mirror

---

### Dimensions

32"D, 40"D or 44"D

### Materials

mirror and bronze or stainless steel

### Finishes

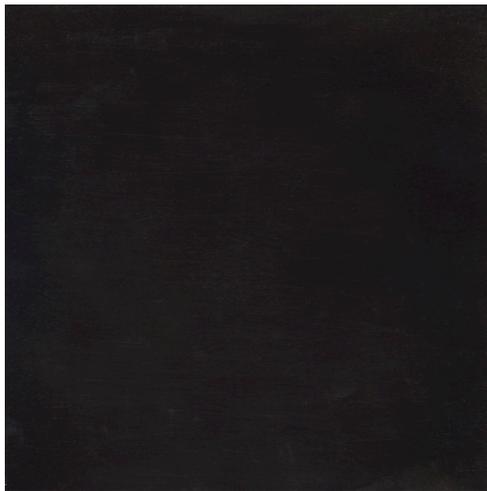

hand-patina bronze, blackened bronze, oil-rubbed bronze, polished bronze\* or satin stainless steel

*\*bronze finishes are waxed and unlacquered as a live finish, in order to allow a rich, natural patina to develop over time.*

This mirror is made with the age old technique of sand-casting, which can produce pitting and surface variations in the metal. We see these as beauty marks that highlight the unique and hand-made nature of each piece.

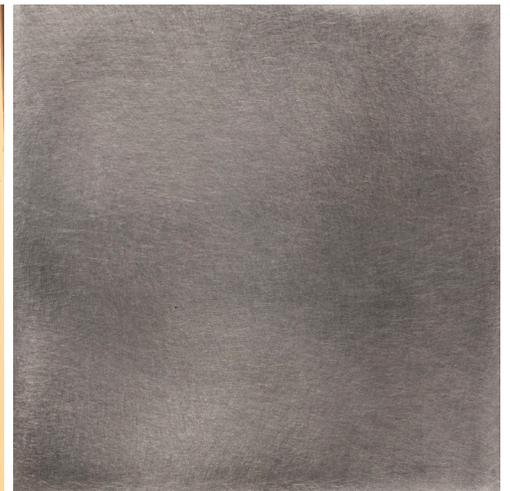

Hand-Patina Bronze

Blackened Bronze

Polished Bronze

Satin Stainless Steel
