konekt

Evolving from an exploration of function and ornament, this series presents sconces as both functional form and decorative object. A wood shade conceals the light source, directing illumination and creating an ambient glow that complements the material's inherent warmth. In tiered configurations, light is reflected between layers, amplifying the depth and cadence of each form.

Decorative metal or lacquered rivets adorn the wood, turning a traditionally utilitarian detail into a refined accent – a nod to the charm of embellishment.

Available in two shapes, curved or pyramid, and in various configurations.
